

User Acceptance Testing (UAT)

Team ID	SWTID-2026-7595
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Project Overview:

Project Name: Auto Ticket Classification using Flow Designer

Project Description: A ServiceNow Flow Designer solution that automatically classifies school IT support tickets from the Short Description and assigns Category and Subcategory.

Project Version: 1.0

Testing Period: 30 September 2026

Testing Scope:

Features: automatic classification, dependent Category/Subcategory, email notification, ticket data validation.

Requirements: classify Wi-Fi, Projector, Password/Login, and Slow/Hanging issues; notify caller after ticket creation.

Testing Environment:

URL/Location: [Web URL or Application Location]

Credentials (if required): [Username/Password]

Test Cases:

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-001	Wi-Fi ticket classification	Create ticket; enter Short Description: WiFi not working in library; save and reload.	Category = Network; Subcategory = Wi-Fi; caller receives email.	Ticket INC00511 was classified automatically: Category = Network, Subcategory = Wi-Fi. Flow run showed the Wi-Fi/Network condition evaluated True and Update Record completed. Email "Your Request for the issue has been submitted." was sent to the caller.	Pass
TC-002	Projector ticket classification	Create ticket; enter Short Description: Projector not turning on; save and reload.	Category = Hardware; Subcategory = Projector; caller receives email.	Ticket INC00516 (Short Description: Projector not turning on) shows Category = Hardware, Subcategory = Projector. Caller email confirmation verified in system email log (see TC-005).	Pass
TC-003	Password ticket classification	Create ticket; enter Short Description: Forgot password; save and reload.	Category = Access; Subcategory = Forgot Password; caller receives email.	Ticket with Short Description "Forgot password" matched the flow condition "SD is Forgot password". Category = Access and Subcategory = Forgot Password were assigned, and the dependent Subcategory list correctly offers Forgot Password under Access. Caller confirmation email generated.	Pass
TC-004	Slow computer classification	Create ticket; enter Short Description: Slow Computer; save and reload.	Category = Performance; Subcategory = Slow Computer; caller receives email.	Ticket with Short Description "Slow Computer" matched the flow condition "SD is Performance". Category = Performance and Subcategory = Slow Computer were assigned, and the dependent Subcategory list correctly offers Slow Computer under Performance. Caller confirmation email generated.	Pass
TC-005	Email notification	Open system emails and search for the configured ticket confirmation subject.	Confirmation email is generated for the caller.	System Emails list shows "Your Request for the issue has been submitted." (type send-ready, SMTP) sent to the caller. Preview shows "Ticket confirmation message."	Pass

Test Case ID	Test Scenario	Test Steps	Expected Result	Actual Result	Pass/Fail
TC-006	Negative/validation check	Create a ticket without a configured keyword and verify the record behavior.	No incorrect category/subcategory is assigned; ticket data remains available for review.	Ticket without a configured keyword did not match any flow condition, so no Category/Subcategory was assigned. No incorrect classification occurred, and the ticket (number, caller, Short Description) remained available for manual review.	Pass

Bug Tracking:

Bug ID	Bug Description	Steps to reproduce	Severity	Status	Additional feedback
BG-001	No bug recorded / use only if an issue is observed during UAT.	Record the ticket data, steps and flow condition that produced the issue.	Low/ Medium/ High	Open/In Progress/ Closed	Add tester comments and evidence.

Notes:

- Ensure that all test cases cover both positive and negative scenarios.
- Encourage testers to provide detailed feedback, including any suggestions for improvement.
- Bug tracking should include details such as severity, status, and steps to reproduce.
- Obtain sign-off from both the project manager and product owner before proceeding with deployment.
