

Project Design Phase-II
Solution Requirements (Functional & Non-functional)

Team ID	SWTID-2026-7595
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	4 Marks

Functional Requirements:

Following are the functional requirements of the proposed solution.

FR No.	Functional Requirement (Epic)	Sub Requirement (Story / Sub-Task)
FR-1	Automatic Ticket Classification	Automatically classify IT tickets based on the issue description. Analyze keywords in the Short Description and Description fields.
FR-2	Category and Subcategory Assignment	Assign both Category and Subcategory without manual intervention.
FR-3	Dependent Category/Subcategory	Support dependent choice logic so Subcategory options change based on the selected Category.
FR-4	Email Notification	Send an automated email notification to the caller upon ticket creation.
FR-5	Structured Ticket Storage	Store ticket information in a structured and standardized format.
FR-6	Maintainability and Scalability	Ensure easy maintenance and future scalability of the no-code solution.

Non-functional Requirements:

Following are the non-functional requirements of the proposed solution.

FR No.	Non-Functional Requirement	Description
NFR-1	Usability	The solution is no-code and easily maintainable. Users enter the Caller Name and Short Description without manually selecting Category or Subcategory.
NFR-2	Security	Only authorized users can access or modify ticket data.
NFR-3	Reliability	Testing and validation confirm that the automation functions reliably and maintains data integrity.
NFR-4	Performance	Automatic classification at ticket creation reduces manual effort and improves ticket routing efficiency.
NFR-5	Availability	The Flow Designer automation is activated and runs automatically on every new ticket, so classification is available whenever tickets are created. The solution is packaged as an exportable update set that can be redeployed to other instances when needed.
NFR-6	Scalability	The solution is designed to be easy to maintain, scalable, and suitable for future extension.
