

Project Development Phase
Solution Performance Test

Team ID	SWTID-2026-7595
Project Name	Auto Ticket Classification using Flow Designer
Maximum Marks	

Solution Performance Testing:

Project team shall fill the following information in the solution performance testing template.

S.No.	Parameter	Values	Screenshot
1.	Solution Summary	ServiceNow Flow Designer no-code automation that classifies school IT tickets using predefined keywords in the Short Description, assigns Category and Subcategory, and sends an email confirmation to the caller.	
2.	Classification Validation	Validated with ticket scenarios. WiFi not working in library → Network / WiFi. Projector not turning on → Hardware / Projector. Email notification is sent to the caller.	
3.	Flow / Rule Validation	Not applicable to machine-learning fine-tuning. The solution uses predefined Flow Designer keyword conditions and update-record actions. Testing confirms the expected Category and Subcategory are assigned.
